

Occupational Needs of Caregivers of Children with Disabilities

We are looking for caregivers who:

- Care for at least 1 child (ages 0-21) with a disability
- Live in the United States
- Are willing to share their experiences

Occupational Therapy students at Russell Sage College are conducting a research study to explore the lived experiences of caregivers and how their perceived quality of life, stress status, and mental health status are impacted

We would love to hear
from you!
